

SUPER SLIM CABLE WITH NEW SLIM HEAD SHELL DESIGN

A

MHY HDMI® CABLES

- MHY-SHDME-5** .5M HIGH SPEED + ETHERNET, 18 Gbps
- MHY-SHDME1** 1M HIGH SPEED + ETHERNET, 18 Gbps
- MHY-SHDME1-5** 1.5M HIGH SPEED + ETHERNET, 18 Gbps
- MHY-SHDME2** 2M HIGH SPEED + ETHERNET, 18 Gbps
- MHY-SHDME3** 3M CL HIGH SPEED + ETHERNET, 18 Gbps
- MHY-SHDME4** 4M CL HIGH SPEED + ETHERNET, 18 Gbps
- MHY-SHDME5** 5M CL HIGH SPEED + ETHERNET, 18 Gbps
- MHY-SHDME6** 6M CL HIGH SPEED + ETHERNET, 10.2 Gbps
- MHY-SHDME7** 7M CL STANDARD SPEED + ETHERNET, 10.2 Gbps
- MHY-SHDME8** 8M CL STANDARD SPEED + ETHERNET, 10.2 Gbps

NEW LENGTH!

HDMI® CABLES

4

A HIGH SPEED HDMI® WITH ETHERNET

HDMI® ETHERNET INCLUDED

The HDMI® Ethernet channel allows you to support a wide range of IP-enabled home entertainment devices without the cable clutter caused by the additional network cables. Therefore you will no longer need separate Ethernet cables to enjoy high speed, bidirectional networking with speeds up to 100 Mb/sec.

24K GOLD PLATED CONTACT CONNECTORS

It is certainly worth noting that not only do these cables look great, they are also designed with the best materials and tested for heavy duty use to deliver stunning picture, sound and control year after year. We use 24k gold contacts to ensure the highest possible connectivity for the best signal integrity. They are also corrosion resistant and provide maximum signal transfer over the life of your system.

MULTI-LAYER SHIELDING

Multiple layers of shielding prevent electromagnetic interference to maximize noise isolation as well as protecting the other components from HDMI® high speed emanations.

AUDIO RETURN CHANNEL (ARC)

The incorporated audio return channel provides the ability to send multi-channel audio from the display back to the surround processor (dependent on the equipment being ARC enabled), reducing cable clutter.

DIGITAL PERFORMANCE LABS (DPL) TESTED

These cables are DPL Labs (www.dpllabs.com) certified to ensure long term usability and performance. DPL testing clears away the "smoke and mirrors" common in the HDMI® cable business by creating a fair but tough comparative standard against which all HDMI® products can be tested.

*18Gbps only applies to MHY-HDM cables up to 5 Meters in length. 6-20 Meter lengths are tested up to 10.2 Gbps.
