

### Specifications

- Mounts to underside or side of a worksurface.
- Lengths available: 24"
- Aluminum Channel with Black Hooks

## CABLE COMBER™ WIRE MANAGER

The Cable Comber is a versatile wire manager which can be mounted horizontally to a modesty panel or to the underside of a worksurface. Plastic channel hooks are slid into an aluminum rail and end caps are used to secure the channel to the surface. Channel hooks are 2" wide providing ample room for managing multiple data or electrical cables. The Cable Comber is 24" long and contains 10 channel hooks. Multiple channels can be run in sequence to cover greater distance.
